This free standing kiosk is ideal for any customer facing environment. Made in sturdy steel it will look good in any front of house situation and can be easily branded to your needs. The Kiosk can house most standard computer sizes from midi -tower to small form and ultra small form factor. The kiosk is powered via a single external power lead with multiple power sockets. The case has lockable doors for secure yet easy access.

RightTouch Series

If our 3 standard specification kiosks don't match your requirement then we can build one that will. Please choose from any of the options below or request a custom kiosk quotation.
