

# SmartCurve Wristband Kiosk

The new **SmartCurve Wristband Kiosk** offers the unique ability of being able to dispense a wide range of wristbands. The kiosk can dispense up to 4 different coloured bands, allowing you to easily identify time-slot “time-up” customers within a busy facility. Along with being able to incorporate payment terminals, all types of card readers, receipt printers, and a camera, it enables a secure, fully automated entry process *without the need for human intervention*.

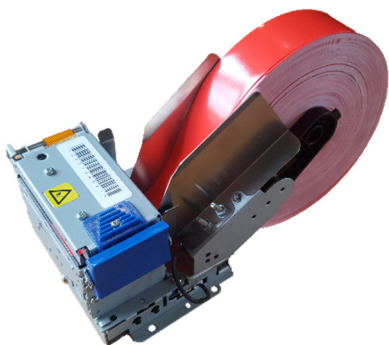

The kiosk can easily be incorporated into any membership software system, allowing you to seamlessly grant entry and then identify paying customers within your facility.

Its smart, familiar design can be easily customised to suit any brand requirements.

## Example Applications:

- Membership Entry Control
- “Pay and Play” entry
- Large scale Attraction customer wristband dispensing
- Time-slot control  
e.g. in swimming pool or spa
